## OFFICIAL LAUNCH OF EGP

After close to seven years of work towards the implementation of an Electronic Procurement System (e-GP), Ghana has become the first country within the West Africa Sub Region to establish the EGP System.

Story continues on Pg. 3

## Vice President praises PPA on establishment of EGP

The Vice President of Ghana, Dr. Mahamudu Bawumia has commended the efforts of the Public Procurement Authority for the establishment of an Electronic Procurement System in Ghana.

Story continues on Pg. 9

## GHANA: TORCHBEARER OF ELECTRONIC PROCUREMENT IN WEST AFRICA

Welcome to May/June edition of PPA e-Bulletin. This edition is dedicated to celebrate the launch of Ghana's e-procurement system, GHANEPS. Yes, GHANEPS is launched at last!

Tuesday, 30<sup>th</sup> April 2019 marked an all-important day for Ghanaians, as far as, saving the public purse is concerned. Ghana's e-procurement system, GHANEPS, which promises to reduce considerably non-compliant to public procurement processes in Ghana was launched on this day. E-procurement is the procurement of Goods, Works and Services with the use of the Internet, as well as, other information and networking systems, such as electronic data interchange.

GHANEPS promises to minimize the human element in the public procurement procedures in Ghana by automating all such processes. Thus, this initiative will not only improve efficiency but also reduce the cost of transactions to Service providers. It also seeks to strengthen accountability, transparency and effectiveness of Governance.

Ghana is the first country to roll out e-procurement system within the West African sub-region. As pacesetters, we look forward to leading other West African countries to embrace it as well.

This edition gives more details in the activities during the launch, including, photos, speeches, as well as, a feature story on the benefits of EGP around the world.

Enjoy reading this edition.

**Public Procurement Authority**  
Improving efficiency and transparency in Public Procurement

**Date:** Tuesday  
30th April, 2019

**Venue:** Ghana Academy of Arts and Science Auditorium

**Time:**  
10 : 00 am

**Theme:**  
**RIISING TO A NEW DAWN  
IN PUBLIC PROCUREMENT**

**Other Speakers**

 <b>HON. URSULA OWUSU-EKUFUL</b> Minister of Communications	 <b>HON. SARAH ADWOA SAFO</b> Minister of State in charge of PP	 <b>AB ADJEI</b> Chief Executive of PPA
---	---	---

**Keynote Speaker: His Excellency DR. MAHAMUDU BAWUMIA**  
Vice President of Republic of Ghana.

The Public Procurement Authority (PPA) wishes to inform you of the official launch of Ghana's Electronic Procurement System.

The e-Procurement System is to transform Ghana's manual procurement process and procedures unto an electronic platform with the use of the internet. This is expected to improve transparency, efficiency and ensure value for money in Ghana's procurement system.

*By: Joana Sakyi Aseidu*

*Senior Administrative Officer (SAO)*

# OFFICIAL LAUNCH OF EGP

Story starts from Pg. 1

The Official Launch was held at the Ghana Academy of Arts and Sciences Auditorium on Tuesday 30<sup>th</sup> April, 2019. Some of the key personalities in attendance were the Vice president, Dr. Mahamudu Bawumia the Minister of Communications Mrs. Ursula Owusu – Ekuful and the country director of the World Bank, Mr. Henry Kerali among others.

The electronic procurement system named GHANEPS is an acronym which stands for Ghana Electronic Procurement System. Recognizing the transformation and benefits the use of technology offers, PPA initiated the process of introducing an Electronic Government Procurement (eGP) System as part of its reforms in the public procurement sector. The event was well attended by Ministers of State, heads of institutions, representatives of the World Bank and other development partners, associations and bodies, civil society, media and students.

## Vice President praises PPA on establishment of EGP

Story starts on Pg. 1

Commending the Board, Management and Staff of the Public Procurement Authority (PPA) as well as the Minister and staff of the Ministry of Communications, Vice President Bawumia said their efforts at tackling procurement fraud would save Ghana many productive man-hours and revenue lost through theft.

“Ghana is indeed entering a new dawn in public procurement. It will soon be a thing of the past where service providers have to travel distances to access tender documents, submit tenders or seek clarifications.

“Use of Tender Boxes will be history. Now your computer is your Tender Box. Civil Societies and for that matter the general public no longer have to go to public entities requesting information on its procurement activities... The e-procurement system is another step aimed at curbing the canker of corruption in our public procurement processes.”

The Vice President on Tuesday 30th April, 2019 launched the Ghana’s Electronic Procurement System dubbed GHANEPS.

*Senior Officer– Corporate Affairs*

## E-GOVERNMENT PROCUREMENT SYSTEM - A TOOL FOR AN EFFICIENT PUBLIC PROCUREMENT SYSTEM

The application of technology to public procurement is on the rise and many Governments have seen the need to embrace technology for the continuous improvement of their procurement systems. These electronic systems known worldwide as Electronic Government Procurement (e-GP) are strictly Government to Business process of using ICT, specifically the internet platform by governments in carrying out procurement relationships with Suppliers, for the acquisition of Goods, Works and Services required by public sector (World Bank 2003).

An e-GP System encompasses the use of electronic methods in every stage of procurement from identification of requirements/needs, tendering, award, payments and contract and project management. The key drivers for e-GP include procurement process (transactional), payment, management information and price benefits. These drivers are interdependent, each enabling the other’s delivery. Therefore, the interaction of these drivers is very important.

There are many benefits to a government’s procurement procedures when it adopts an e-Government Procurement System since it seeks to create an effective, efficient and transparent World Class Procurement system driving value for money. Countries as varied as Ukraine, Korea, Vietnam, Mongolia, Costa Rica, Jordan and other developing countries suffer from ineffectiveness and corruption in the public services sphere and in the

## E-GOVERNMENT PROCUREMENT SYSTEM - A TOOL FOR AN EFFICIENT PUBLIC PROCUREMENT SYSTEM

process, billions of dollars are lost to these public procurement inefficiencies. However, with the implementation of e-GP reforms such as e-Bidding/e-Tendering, e-Catalogue Management, e-Contract Management, e-Supplier Performance Management, e-Auction and e-Payment Systems, these losses have been minimized. Notably, nearly 250 billion Hryvnas (more than 10 billion dollars) were spent in Ukraine in 2014 for procurement of goods, services and works for public needs. According to international research, usage of e-Procurement system saves at least 10% of the procurement budget. Applying simple mathematical logarithms, 2.7 million dollars can be saved each day. With the introduction of an e-GP system known as Prozorro in Ukraine it allows for the adherence of Ukraine legislature with European standards, giving Ukraine a transparent procurement procedure thereby bringing Ukraine closer to a World Class standard([Головна | ProZorro](#)"(in Russian). Retrieved 2017-04-05)

On 1<sup>ST</sup> February 2016, Prozorro was expanded to include other sectors including sales due to the success seen in the public procurement sector in reducing corruption by 25%. The sales include sale of state properties, municipal properties, small privatized objects, buildings and also sales of materials such as scrap metal, and raw wood.

Korea has also recorded significant benefits since its implementation of its e-GP System known as Korean On-line Procurement System (KONEPS). Since its' inception in the early 2000s, Korea has experienced notable improvements in the administration of its public procurement system. It has brought about an increase in transparency, competition and efficiency in the Korean economy. For example, before the introduction of the e-GP System, government spent over 30 hours validating received tenders and related documents as well as selecting the winning tender. However, with the introduction of the system it now spends less than 30 minutes in carrying out same activities.

Africa has also embraced the concept of Electronic Procurement systems where countries such as Rwanda, Tunisia and Cameroon have recorded significant benefits. Rwanda is the first African country to implement an e-GP system nationally and in a shorter period of time when compared to other countries. With the implementation of its e-GP system known as UMUCYO, there has been notable improvement in the reduction of fraud and corruption as there is no personal contact with tenderers. In addition, complaints received from tenderers are responded to through the system in a transparent manner.

### **BENEFITS TO GHANA**

The traditional process of carrying out procurement relationships has a number of challenges that increases cost in resource terms as well as causes delays in the procurement process. These challenges include;

- ◆ Repetitive lengthy operations
- ◆ Miscommunication between tenderers and buyers
- ◆ Human interface at every stage causing delays
- ◆ Inefficient records management

## E-GOVERNMENT PROCUREMENT SYSTEM - A TOOL FOR AN EFFICIENT PUBLIC PROCUREMENT SYSTEM

- ◆ Suppliers selection bias
- ◆ Collusion among tenderers
- ◆ Missing tender documents

Ghana's adoption of an Electronic Government Procurement System therefore opens a window of opportunities for suppliers/contractors/service providers, and entities as well as the economy as a whole. The country can benefit in three main ways:

- ◆ Increased Transparency
- ◆ Increased Efficiency
- ◆ Cost Savings

### **Increased Transparency**

- ⇒ Supports easy access to tender documents and allows for clarifications.
- ⇒ Disclosure of tendering results and contract details to the general public.
- ⇒ Interested stakeholders can access various reports due to the standardized data structure of the system.
- ⇒ Suppliers/Contractors/Service Providers receive prompt feedback regarding their tenders.
- ⇒ Minimise or eliminate unstructured paper or email exchanges.

### **Increased Efficiency**

- ⇒ Facilitates the management of complicated projects involving a large number of documents, project tasks, projects, and deliverables
- ⇒ Automates complex workflows and approval procedures.
- ⇒ Improves procurement lead times.

### **Cost Savings**

- ⇒ Supports decision making regarding price trends and specifications.
- ⇒ Improves budgeting due to availability of procurement history.
- ⇒ Improves competition among tenderers.
- ⇒ Electronic issuing and processing of invoices and payments.

In conclusion Electronic Government Procurement is an updated and real time internet based system for procurement of Goods, Works and Services using public fund. The efforts of government should be appreciated for digitizing the public procurement process in Ghana since it will go a long way to protect the public purse.

## GHANA EMBRACES ELECTRONIC PROCUREMENT SYSTEM

This brief compilation of both print and online headlines show how Ghana embraced the launch of the Electronic Procurement System—GHANEPS

**Friday May 3, 2019 - Daily Graphic**

The country director of the World Bank, Mr. Henry Kerali says Ghana can save more than \$100 million, an equivalent of two percent of its Gross Domestic Product (GDP) for introducing the e-procurement system.

**Thursday May 2, 2019  
Business & Financial Times (B&FT)**

The Vice President, Dr. Mahamudu Bawumia, has launched an electronic procurement system that will enhance government procurement processes and is expected to reduce by 90 percent all

corruption cases associated with public procurement.

**Wednesday May 1, 2019  
Ghanaian Times**

The Vice President Dr. Mahamudu Bawumia has launched an electronic procurement system estimated to save the country \$100 million annually through the prevention of corruption and inefficiencies in public procurement.

**Ghanaweb**

**Tuesday, 30 April 2019**

Vice president Dr Mahamudu Bawumia on Tuesday April 30, launched a new Electronic Public Procurement portal as part of efforts to fight corruption

## MESSAGE FROM THE CEO

Thank you all for honouring our invitation to attend the official launch of Ghana's Electronic Procurement System "GHANEPS".

Your presence helped make this event a success.

We truly appreciate your support.
